

Federal Student Loan Programs

StudentAid.gov

Will you need a loan to attend college?

If so, think federal aid first. Federal student loans usually offer borrowers lower interest rates and have more flexible repayment terms and options than private student loans.

1. What is a federal student loan?

Federal loans are borrowed funds that you must repay with interest. A federal student loan allows students and their parents to borrow money to help pay for college through loan programs supported by the federal government. They have low interest rates and offer flexible repayment terms, benefits, and options.

2. What is a private student loan?

A private student loan is a nonfederal loan issued by a lender such as a bank or credit union. If you're not sure whether you're being offered a private loan or a federal loan, check with the financial aid office at your school.

3. Why are federal student loans a better option for paying for college?

Federal student loans offer borrowers many benefits not typically found in private loans. These include low fixed interest rates, income-based repayment plans, cancellation for certain employment, and deferment (postponement) options, including deferment of loan payments when a student returns to school. Also, private loans usually require a credit check. For these reasons, students and parents should always exhaust federal student loan options before considering a private loan.

4. How much should I borrow?

Borrow only what you need and consider the earnings potential in your chosen profession to determine how easily you can repay your debt. You can find career salary estimates at the U.S. Department of Labor's Occupational Outlook Handbook at www.bls.gov/oooh. Your student loan payments should be only a small percentage of your salary after you graduate.
